

Contents

0	Why study probability?	4
1	Foundations of probability, inclusion-exclusion and equally likely outcomes	5
1.1	Basic ideas	5
1.2	Mathematical formulation	5
1.3	Discrete Uniform Distribution	10
1.4	Inclusion-Exclusion Principle	11
2	Conditional probabilities, random variables and the binomial distribution	13
2.1	Conditional Probability	13
2.2	Bayes' Theorem	17
2.3	Exercises	20
2.4	Independence	21
2.5	Random Variables	22
2.6	The Binomial Distribution	23
3	More discrete and continuous distributions	26
3.1	Geometric Distribution	26
3.2	Continuous distributions	27
3.3	Exponential Distribution	29
3.4	Poisson Distribution	31
3.5	Exercises and problems	34
4	Expectation	36
4.1	Idea and definition	36
4.2	Linearity of Expectation	38
5	More expectations and variance	44
5.1	Conditional Expectation	44
5.2	Variance	44
5.3	Exercises and Problems	46
6	Sums are Normal	49
6.1	The Gaussian Distribution	49
6.2	The Central Limit Theorem	50
6.3	Exercises and problems	55
7	Several Random Variables	57
7.1	Joint densities	57
7.2	Exercises	61
7.3	Minimum and Maximum of Random Variables	62
7.4	Convolution/Sum of Random Variables	63

8	Transformations, Chebyshev's inequality and LLN	67
8.1	Transformations	67
8.2	Exercises and problems	69
8.3	Chebyshev's Inequality and the Law of Large Numbers	69
9	Covariance and Correlation	72
9.1	Definition	72
9.2	Properties	72
9.3	Notes	74
10	More and more	76
